

# Final Critique and Wireframes

By: Erick Perez

DGM 2740 Principles of Web Languages

Professor: Paul Cheney

# Introduction

The lodging website I found that needs improvement is **Badrock.com**. Bad Rock is a bed and breakfast in Montana. The last time this website was updated was in 2011. It looks outdated and needs improvement. I will walk you through some of the parts that need improvement. The first thing I want to change is the size of the container. Their current container is 800px wide. Today, that is a small container. I will change it to 1024px wide.

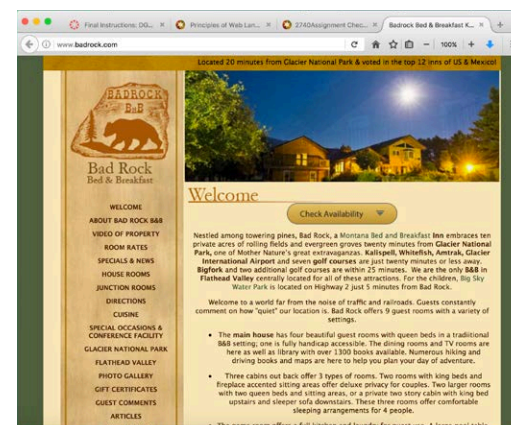

The second obvious problem I found it that the site is not a responsive website. On a small window the site looks the same, nothing is resized and you get horizontal scroll. If you open the site on a mobile phone it redirects you to a mobile version. The mobile version is only one page that links you back to the desktop version. The content on the mobile version is also useless for most users.

Badrock.com Home Page (Desktop)

800px

Home Page (Tablet)

Home Page (Phone)

# Problems

I noticed the navigation was really long. A few items could even be in the same page. Other items could be grouped together. Some links took you to a page that said “page under construction”. The last update was 2011 and the page is still under construction. This site needs improvement with their information architecture.

## Navigation

## Social Links

The presentation of these icons can be a lot better. They should have made the background transparent. I will use an icon library to replace these.

This link takes you to a youtube video on youtube. I don't see the need for leaving the site. I will embed the video on the site in a separate page.

## Rates Page Table

Room Name	June 16 - Sept 19	Oct 20 - May 15	Sept 20 - Oct 19
<b>Bad Rock Junction Rooms</b>			
<b>Lake MacDonald</b> (Room 8) and <b>St. Mary Lake</b> (Room 7)	\$229	\$120	\$169
<small>Log Cabin bedrooms, 2 queen beds &amp; sitting area, gas log fireplace, mountain &amp; sunset views, private bath w/ shower.</small>			
<b>Hidden Lake</b> (Room 6) and <b>Avalanche Lake</b> (Room 5)	\$215	\$120	\$169
<small>Log Cabin bedrooms, king bed, sitting area, gas log fireplace, mountain and sunset views, private bath w/ shower.</small>			
<b>Swan Mountain</b> (Cabin 9)	\$239	\$120	\$169
<small>Single Log Cabin with kitchenette, full bath and fold out queen sofa on lower floor. Upper floor has king size bed and deck.</small>			
<b>The Main House Rooms</b>			
<b>Big Mountain</b>	\$199	\$120	\$169

On the rates page this table is displayed. This table looks old. It is also a little confusing. The dates for the headings are not in order. It would make more sense if they are in order. I will clean it up and add semantic code.

## About page Side bar

### Inn Amenities

- High Speed Internet, fax machine, free local calls
- We loan out snow shoes, kayaks and bicycles
- Game room with full kitchen and laundry facilities, weight machine, elliptical machine, recumbent bicycle, pool table, air hockey, darts and skittles
- Outdoor games: horse shoes, volleyball and badminton nets, and a fire pit for roasting marshmallows
- Dining room or game room may be used for meetings or catered affairs
- DVD player, open bar area, microwave
- Reading room/living room: Use of library with over 1300 volumes; some paperbacks can be taken home with guest
- Loaner equipment for hiking: Bear spray, rain ponchos, hiking sticks, binoculars, backpacks, fanny packs

I found this side bar on the about page. I think the information is too close. It needs more space. The tight space makes it seem small and the information looks long. When I first saw this I didn't even want to read it. It can be displayed better.

The title and gradient is an image. This can now be done with CSS3. I will be using CSS.
